

The NL4-PP works great! I think its the best thing I've ever bought for the boat and the price was awsome. The install took about 10 minutes (would have been faster, but I had to drill a hole for the wire) and was no brainer. Thanks Cary and I'll for sure spread the word out on the lake about your GPS systems. I hope you use this as feedback on your site because I am way excited about my new GPS system.

Thanks,  
Brent
