

Hello Cary,

Just wanted to let you know the Nautic Laugic is working excellent on our 07' Supra 22SSV. PerfectPass is actually doing it's job now. Very easy install and really is a life saver for this boat since the PerfectPass was an integrated system in the dash. It would have been a very expensive upgrade to do a Stargazer unit and would require mounting a new speedo under the dash which would have been very unsightly! This system saved over \$1k from the Stargazer and kept the boat stock looking. SO VERY IMPRESSED!!

One question I did have, rather wanted to confirm. Is it normal that the GPS antenna has a blinking orange light on it?

Thanks again Cary!

Best regards,

Drew
