

Perfect! You can tell anybody that contacts you about your GPS speedo receiver on a Sanger DXII barefoot boat that I think IT IS AMAZING. You guys have a great product, provide amazing support and I could not be happier. Every Sanger DXII boat owner should have one and this should be an option, if not a standard product on all new Sangers. I'm forwarding my comments to the designer of the Sanger Barefoot Boat Mr. Pellaton, and a couple of DXII owners I know.

If you like, I can send out a newsletter to about 150 Southern Regional Barefooters about your product, get me some text.

God Bless, Mike
