

Cary,

The install was a piece of piss, mate, very quick and easy.

I haven't adjusted the NN filter, I assume there are instructions to do this in the paperwork supplied?  
What does this do?

I was very happy when I go the boat in the water and the cruise control just simply worked. Very nice and super impressed.

Thanks a heap mate, I've got a few mates with Malibus that I will be recommending they switch over even if their paddle wheel still works!

Cheers,

***Rance***
